

WOMEN OILY SKIN SET

This set has been designed with the objective of cleaning, hydrating and protecting oily skins, while minimizing the appearance of wrinkles and flaccidity in the skin.

These products are directed to the cleaning and care of oily skins.

The use of these 4 products reduces the clogging of the pores, balances the skin's pH and minimizes imperfections while providing hydration. It also helps prevent premature aging.

Recommendation 1 The use of an exfoliant once a week can help you on the proper care of your skin.

Recommendation 2 It is highly recommended to apply an eye contour cream in the mornings and at night in order to prevent and minimize wrinkles, dark circles and bags. Recommended from 25 years approx.

* Contains physical sunscreen.

We use organic ingredients.

Without perfums nor colorants.

COMPLETE CARE - WOMEN OILY SKIN

As part of the holistic philosophy of 5punto5, here are some tips to take care of your skin on a day-to-day basis. You can download the complete care handbook with much more information at womanoilyskin.5punto5skinlab.com

Recommended Foods

Vegetables and fruits. With great antioxidant capacity, they help control inflammation. With provitamin A (carrot), vitamin E (avocado), vitamin C (kiwi), vitamin D (mushrooms), zinc (pumpkin, mushrooms), magnesium (spinach), copper (avocado), selenium (cucumber, garlic), sulfur (celery, onion). We recommend 5 servings/day.

Rich in Omega-3 fatty acids. Among their functions, they act against inflammation. They can be from animal sources (mackerel, sardines) or vegetable sources (nuts, spinach). Include seeds or nuts in your daily diet. Oily fish, at least twice a week.

Those that improve the intestinal flora. Good intestinal health reverts to the state of our skin. Cereals and integral derivatives (rice, legumes such as lentils), nuts, vegetables (artichoke, asparagus, leek, onion), as well as probiotics (yogurt, kefir). These foods should be part of your daily diet.

Water. It maintains tissues nourished. We recommend 2.5 liters/day.

Physical Exercise

With **moderate exercise** we secrete endorphins, which reduce stress, improve sleep, increase dopamine and decrease cortisol. And above all, it increases the lactic acid of the skin, helping to maintain the optimal pH. If the exercise is extreme, we enter into stress situations which is negative for the skin.

A combination of **aerobic** (running, swimming) and **anaerobic** (push-ups, abs) exercise is recommended.

It is also advisable to take deep breaths every day.

NON Recommended Foods

Rich in trans fats. They can stimulate the production of sebum. Everything with margarine or butter, "fast food", as well as processed fried food.

Rich in saturated fatty acids. They can stimulate inflammation. Includes animal fats (bacon), full fat dairies (cream), "fast food", and coconut, palm and palm kernel vegetable oils.

Those that cause insulin spikes. They can favor an increase of fatty acids (soft drinks, candy, industrial pastries, sugar).

Alcohol. It is related to oxidation, inflammation and dehydration of the skin, as well as with the alteration of blood flow causing redness.

Other Tips

Tobacco. Free radicals accelerate aging. Tobacco promotes oxidative stress, so it has a very negative influence on the skin. It also has a negative influence on the hair follicles.

Ultraviolet rays. The sun accelerates, just like tobacco, oxidative stress weakening the structure of the skin. Use creams with physical sunscreen and avoid sunbathing between 12.00 and 16.00. If you take foods rich in antioxidants, your protection will be more effective.

Sleep. Sleeping at least 7 hours a day is crucial for good cellular functioning.

Stress. It affects negatively since it releases cortisol which produces an increase in insulin and fat. It also increases the generation of free radicals.
